Any impact the SI may have on the Assembly’s legislative competence and/or the executive competence

Pesticides are a matter in which the National Assembly has legislative competence but in which the Welsh Ministers do not have functions. These Regulations contain provisions which enable the Welsh Ministers to exercise functions in relation to Wales without encumbrance and for the Welsh Ministers to provide consent to the Secretary of State to exercise functions in relation to Wales. They also contain provisions which enable the Secretary of State to exercise functions alone but only with the consent of the Devolved Authorities in relation to devolved territories

Functions transferred to the Secretary of State with consent would constitute functions of a Minister of the Crown for the purposes Schedule 7B to GoWA 2006. This therefore may be a relevant consideration in the context of the Assembly’s competence to legislate in the future in these areas. Functions transferred to the Secretary of State alone but which can only be exercised with the consent of the Devolved Authorities in relation to devolved territories constitute functions of a Minister of the Crown for the purposes of Schedule 7B to GoWA 2006. A future Assembly Bill seeking to remove or modify these functions could trigger a requirement to consult the UKG.

The purpose of the amendments

Plant protection products are 'pesticides' that protect crops or desirable or useful plants, regulate plant growth or prevent growth of unwanted plants. They are primarily used in the agricultural sector but also in forestry, horticulture, amenity areas and in home gardens. For example, they play a fundamental role in UK farming and the provision of food, keeping the transport infrastructure clear of weeds, maintaining public spaces and controlling invasive species. However, as plant protection products contain chemicals that are designed to disrupt life processes, risks can be associated with their use.

The changes made by this statutory instrument will ensure plant protection products will continue to be effectively managed after EU Exit. This will enable the UK to have an operable regulatory framework after EU exit to ensure that plant protection products continue to pose no unacceptable risks to humans or the environment, whilst facilitating production of affordable food and trade in food produce. The Regulations will also ensure enforcement regulations continue to operate alongside the main regulations governing marketing and use of plant protection products and the setting of maximum residue levels, once they have been retained in national law and corrected so as to work sensibly in a national context..

This Statutory Instrument and accompanying Explanatory Memorandum, setting out the effect of amendments is available here: <https://beta.parliament.uk/statutory-instruments/PyC5117b>

Why consent was given

Consent has been given for the UK Government to make these corrections in relation to, and on behalf of, Wales for reasons of efficiency, expediency and no policy divergence with the amendments. The amendments have been considered fully; and there is no divergence in policy. These amendments are to ensure that the statute book remains functional following the UK's exit from the EU.
