

National Assembly for Wales Cynulliad Cenedlaethol Cymru

Key Statistics for Caerphilly Constituency

Abstract

This paper provides key statistics for Caerphilly Assembly Constituency area, under a number of topic headings.

This is one of a series of Members' Research Service profiles for the new Assembly Constituencies and Regions in Wales that will take effect for the Assembly election in May 2007.

Revisions made May 2007.

Key Statistics for Caerphilly Constituency

Introduction

Background

A review by the Boundary Commission for Wales introduced changes to the boundaries of Assembly constituencies and Assembly electoral regions that will be used for the Assembly election in May 2007. Caerphilly experienced substantial changes as a result of the review, involving the loss of around 5,700 residents. For further details and a summary of all changes, see the recent research paper¹ from the Members' Research Service.

This paper provides key statistics for Caerphilly Assembly Constituency area, under a number of topic headings. It is part of a series of Members' Research Service profiles for the new constituencies and regions in Wales (those that will take effect for the Assembly election in May 2007), published in March 2007. Each of the 40 constituencies has a separate profile, and statistics for the five Assembly electoral regions have been brought together in a single paper.

The Members' Research Service produced a series of profiles for local authorities in November 2006. The content of the profiles for constituencies and regions differ from those produced for local authorities. Since electoral geographies do not form a standard statistical geography, and because the new areas are not yet in force, the availability of data at this level is limited. These profiles therefore do not contain the detailed commentary and charts showing trends that were available for local authorities.

Two constituencies (Blaenau Gwent and Ynys Môn/Isle of Anglesey) are also local authorities, so as well as their profiles in this constituency series, these areas have profiles which were produced for the local authority series in November 2006, with some different data and more detailed commentary.

Structure of this paper

This introduction is followed by a map of the Caerphilly area and a summary providing an overview of key facts about Caerphilly. The next sections show four tables with statistics for several topic areas, and a section on deprivation. The information is drawn from several different sources, with details on the sources and definitions in use listed in the last section on 'sources and notes'.

The tables in this paper show statistics for Caerphilly along with comparable figures for the region (South Wales East) and for Wales as a whole.

Actual results for past elections are not included in any of these profiles as they are not valid for many of the new constituencies or regions given the boundary changes. Following the Assembly election in May 2007, election statistics will be available for each new constituency and region.

¹ Members' Research Service, *Assembly Constituencies and Electoral Regions* http://assembly/presidingoffic/mrs/briefings/2007/mrs062541%20research%20paper%20%20assembly%20constituencies%20and%20electoral%20regions.doc

Sources for further information

The statistics shown in this paper have been compiled by Members' Research Service, or supplied on request by the Statistical Directorate of the Welsh Assembly Government, the Office for National Statistics and the Department for Work and Pensions.

Little data is currently available for the new Assembly electoral areas, as statistics tend to be compiled for new geographies after they come into force. Over the coming months, statistics for the new areas (and for existing constituencies which continue as Parliamentary constituencies until the next General election) may become available through the sources described below:

- the website² for the Statistical Directorate of the Welsh Assembly Government;
- the Office for National Statistics website³:
- the official labour market statistics website 'nomis'⁴;
- the 'statistics and research' section of the Department for Work and Pensions' website⁵.

⁵ http://www.dwp.gov.uk/asd/

Map of Caerphilly Constituency

Summary

The following points provide a brief overview of Caerphilly, drawn from detailed statistics in the main body of this paper. Technical terms have been avoided, and in general the reference periods of the statistics are not mentioned (as these vary, and in each case the most recently available data are shown).

- Following a review by the Boundary Commission for Wales, there are changes to the boundaries
 of Assembly constituencies and Assembly electoral regions that take effect for the Assembly
 election in May 2007. Caerphilly experienced substantial changes as a result of the review,
 involving the loss of around 5,700 residents.
- Around 83,200 people live in Caerphilly, which with 727 people per square kilometre is more densely populated than Wales as a whole.
- The area's population rose by 0.9% between 2001 and 2004, compared to a rise of 1.5% across Wales.
- At 1 December 2006, in Caerphilly there were around 62,000 electors registered on the electoral roll and entitled to vote in an Assembly election.
- A lower share of the population in Caerphilly (17.2%) than in Wales (20.4%) is of retirement age.
- An estimated 88% of the area's residents were born in Wales, and 12% of people aged three or more can speak Welsh, compared to 20.5% across Wales.
- Compared to Wales, a slightly lower proportion of working age people in Caerphilly are in employment (68.6%), and a higher proportion are claiming Job-Seekers' Allowance (3%).
- Proportionally, more adults aged 16 to 74 in Caerphilly than in Wales have no qualifications, and noticeably fewer pupils achieved five or more GCSEs grade A*-C in the area than in Wales (43% and 54% respectively).
- Compared to Wales, the pupil teacher ratio in Caerphilly is higher in both primary and secondary schools.
- In Caerphilly, a higher percentage of people than in Wales reported having a limiting long-term illness (25.2%), and a higher percentage of the working age than in Wales claim incapacity benefits (14.8%).
- There are around 33,300 households in the area, a noticeably higher proportion of which are owner occupied than across Wales (74.8% and 71.3% respectively).
- The Welsh Index of Multiple Deprivation 2005 ranks specific small areas in Wales in terms of deprivation: 11% of Caerphilly's areas fall in the 10% most deprived areas in Wales, and the majority of its areas are more deprived than the Wales average.

Deprivation Statistics

The Welsh Index of Multiple Deprivation 2005 (WIMD) is a measure of deprivation for small areas in Wales. It ranks statistical geographies known as Lower Super Output Areas (LSOAs) in terms of deprivation across various domains such as health and employment, as well as providing an overall deprivation rank. Although WIMD does not provide deprivation ranks for constituencies as a whole it is possible to look at the rank of LSOAs within a constituency.

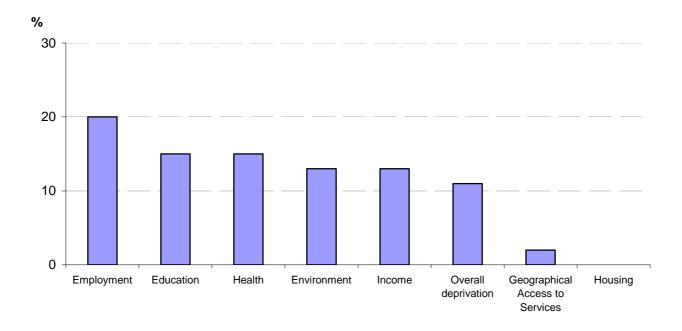

In Caerphilly (which has 54 LSOAs):

- 6 LSOAs (11%) fall within the 10% most deprived LSOAs in Wales;
- The majority (65%) of LSOAs are more deprived than the Wales average (i.e. the median area according to WIMD ranking, so half of all LSOAs in Wales are more deprived and half are less deprived than the 'Wales average').

In relation to Wales as a whole, this means that a typical proportion of areas in Caerphilly are among the 10% most deprived, and overall the majority of areas fall in the more deprived half of Wales.

Figure 1 shows what proportion of Caerphilly's LSOAs are in the 10% most deprived in Wales for each individual domain as well as for overall deprivation.

Figure 1: The % of LSOAs in Caerphilly that are in the 10% most deprived LSOAs in Wales, for overall deprivation and by domain, 2005

Source: Welsh Index of Multiple Deprivation 2005

These statistics were compiled from WIMD data in StatsWales Table 002456⁶. For more details on the index please see the WIMD web pages⁷.

http://new.wales.gov.uk/topics/statistics/theme/wimd2005

⁶ http://www.statswales.wales.gov.uk/TableViewer/tableView.aspx?ReportId=2456

Sources and notes

Table 1: Population statistics

1-a These statistics have been calculated from mid-year population estimates (for 2001 and 2004) provided by the Office for National Statistics (ONS). The electoral area population estimates are an aggregation of previously published Lower Layer Super Output Area (LSOA) population estimates. Information about the ONS small area population estimates project can be found on the National Statistics website:

www.statistics.gov.uk/sape

There is a single LSOA W01000086 (Gwynedd 008B) which extends into two assembly constituencies - Arfon and Dwyfor Meirionnydd, which cover different Electoral Regions (Mid & West Wales and North Wales). The mid-2001 and mid-2004 population estimates for W01000086 have been split to the two assembly constituencies based on the identifiable number of properties within each km grid square using an OS 1:50,000 base map. This gives the following total number of properties by assembly constituency Arfon 235 and Dwyfor Meirionnydd 332, giving proportions of 0.4145 and 0.5855 respectively. No communal establishments have been identified within this LSOA, and so therefore it is assumed that the age structure between the two parts of W01000086 will be similar.

- 1-b The population density has been calculated from mid-2004 population estimates (see note 1-a), and area measurements compiled from Census 2001 statistics (see note 1-d). Area measurements are based on the 2001 version of the Ordnance Survey Boundary-Line data-set, amended where district boundaries have changed since 2001, and do not include inland water.
- 1-c Working age is 16-64 for males, 16-59 for females, and retirement age is 65+ for males, 60+ for females.
- 1-d These statistics have been aggregated from Census 2001 Key Statistics for electoral divisions, using SASPAC (software specifically written for the analysis and interrogation of datasets derived from the Census of Population).

In general, there may be occasional small discrepancies between counts or percentages shown in Census tables from different sources. This is usually because cells in Census tables are randomly adjusted to avoid the release of confidential data.

General details on the Census can be found on the first website below, and the second link is to the 'Census 2001 Definitions' which includes a glossary of terms:

www.statistics.gov.uk/census

www.statistics.gov.uk/downloads/census2001/definitions_chapters_1_5.pdf

- 1-e A 'communal establishment' is defined as an establishment providing managed residential accommodation, where 'managed' means full-time or part-time supervision of the accommodation.
- 1-f 'Non-white ethnic group' includes people from a mixed white-other ethnic group.
- 1-g A 'migrant' is a person with a different address one year before the Census to that on census day.
- 1-h The EU is as defined on Census day (29 April 2001).
- 1-i One or more skills in Welsh' means speaks, reads, writes and/or understands Welsh.
- 1-j 'Identified as Welsh' means those who have written 'Welsh' or 'Cymraeg' or similar in one or more of the write-in boxes in the ethnic group question.
- 1-k StatsWales (table 003462)

http://www.statswales.wales.gov.uk/TableViewer/tableView.aspx?ReportId=3462

The number of people who were registered on the electoral roll and were therefore entitled to vote, as at 1 December 2006. It is based on the qualifying date of 15 October 2006. If there had been an election on 1 December 2006 then those who registered after 15 October would not be eligible to vote. Note that entitlement to vote is different for Assembly and Parliamentary elections. EU citizens resident in Wales are entitled to vote at National Assembly for Wales (and local government elections) but not at Parliamentary elections.

Table 1: Population statistics (continued)

1-I ONS, UK Electoral Statistics 2006 (Table 2b)

http://www.statistics.gov.uk/statbase/ssdataset.asp?vlnk=9566&More=Y

This table is derived from data supplied to the ONS by Electoral Registration Officers and shows the number of people who on 1 December 2006 were registered to vote in parliamentary elections in the UK. The latest Electoral Register came into effect and is based on a qualifying date of 15 October 2006. The total number of parliamentary electors is residential qualifiers which includes overseas electors. Overseas electors are not resident in the United Kingdom, but must previously have been resident here and included in the electoral register (unless they were too young to register). They are registered in the same parliamentary constituency as before they went abroad. The residence qualification requires a person to be normally living at the address on the qualifying date even if temporarily absent. People having more than one place of residence, such as students, may therefore be included on more than one register, but they are only entitled to vote in one constituency in a general election.

Table 2: Economic and Labour Market Statistics

- 2-a See note 1-d.
- 2-b These statistics were provided by the Statistical Directorate of the Welsh Assembly Government, and use information from the ONS's Annual Labour Force Survey / Annual Population Survey for the year to 30 June 2006. Statistics for electoral areas have been aggregated from estimates for Output Areas. They show rates of working age people 'in employment' and 'economically inactive (excluding students)'. Rates of unemployment are not shown due to the small sample sizes involved (at constituency level), and since alternative statistics on Job-Seekers' Allowance claimants are provided. Further information on the data source is provided on the following webpage:

http://www.statistics.gov.uk/statbase/Product.asp?vlnk=11711&More=Y

2-c These statistics were provided by the Department for Work and Pensions (DWP). Data for electoral areas were aggregated using data for electoral divisions from the Work and Pensions Longitudinal Study. Counts of claimants or beneficiaries for August 2006 were provided (rounded to the nearest ten), and rates have been derived using the population estimates described in note 1-d, unless otherwise stated. See the following website for further information on statistics produced by the DWP:

www.dwp.gov.uk/asd

- 2-d Includes those receiving Incapacity Benefit or Severe Disablement Allowance. Incapacity Benefit is paid to people who are assessed as being incapable of work and who meet certain contribution conditions. Until April 2001, people who were incapable of work and did not satisfy the contribution conditions for Incapacity Benefit could get Severe Disablement Allowance.
- 2-e Disability Living Allowance is a tax-free benefit for children and adults (under 65) who need help with personal care or have walking difficulties because they are physically or mentally disabled.
- 2-f Income Support is intended to help people on low incomes who do not have to be available for employment. The main types of people who receive it are lone parents, the long and short-term sick, people with disabilities and other special groups. Rates are calculated using Census 2001 estimates of numbers of households (see note 1-d).
- 2-g Pension Credit is designed to help pensioners at the lower end of the income scale by ensuring a guaranteed minimum weekly income (guaranteed credit) and, in addition, to reward those people who have made modest provision for their retirement (savings credit). Pension Credit is claimed on a household basis and therefore the number of people that Pension Credit helps ('beneficiaries') is the number of claimants in addition to the number of partners for whom they are also claiming.

Tabl	a 2. Education Ctatistics
	e 3: Education Statistics
3-a	See note 1-d. The highest level of qualification is derived from responses to both the qualifications and the professional qualifications questions on the 2001 Census, and the levels are defined as follows: Level 1: 1+ 'O' level passes, 1+ CSE/GCSE any grades, NVQ level 1, Foundation GNVQ. Level 2: 5+ 'O' level passes, 5+ CSEs (grade 1), 5+ GCSEs (grades A-C), School Certificate, 1+'A' levels/ AS levels, NVQ level 2, Intermediate GNVQ. Level 3: 2+ 'A' levels, 4+ AS levels, Higher School certificate, NVQ level 3, Advanced GNVQ. Level 4/5: First degree, Higher degree, NVQ levels 4 and 5, HNC, HND, Qualified Teacher status, Qualified Medical Doctor, Qualified Dentist, Qualified Nurse, Midwife, Health Visitor.
3-b	These statistics were provided by the Statistical Directorate of the Welsh Assembly Government. Data for Wales includes independent schools except for teacher assessment data where information was not received from independent schools. Core subjects are English or Welsh, Maths and Science.
3-c	Foundation Phase pilot schools were not required to provide teacher assessment data at Key Stage 1 for 2005/06. This affected nine maintained primary schools.
3-d	See note 3-b. Examination results relate to full-time pupils at maintained secondary, special and pupil referral units in Wales. Independent schools and further education colleges are not included. Core subjects are English or Welsh, Maths and Science. Tabl	e 4: Health, Housing and Transport Statistics
4-a	See note 1-d.
4-b	A household comprises one person living alone, or a group of people living at the same address with common housekeeping (sharing a living room/sitting room or at least one meal a day). 'Total households' refers to households with residents; 'total household spaces' to households with or without residents.
4-c	A dependent child is a person aged 0-15 in a household (whether or not in a family) or a person aged 16-18 who is a full time student in a family with parent(s).
4-d	A household is counted as 'overcrowded' if its occupancy rating is -1 or less (implying there is one room too few). The occupancy rating assumes that every household, including one person households, requires a minimum of two common rooms (excluding bathrooms).
4-e	'Travel to work by car' means driving (or as a passenger in) a car or van, or by taxi/minicab. 'Travel to work by public transport' means by underground, metro, light rail, tram, train, bus, mini bus or coach.
