

# NHS Referral to Treatment Waiting Times

July 2012

## Introduction

This briefing provides information on the performance of Local Health Boards (LHBs) against the Welsh Government targets for NHS treatment waiting times. Most NHS waiting times in Wales are measured against the time from referral to treatment (RTT), although there are a number of exceptions.<sup>1</sup> **The RTT is the period of time from referral, by a GP or other medical practitioner, to hospital for treatment.**<sup>2</sup>

In 2011-12 the Welsh Government targets for NHS RTT waiting times are to ensure that:

- **At least 95 per cent of patients waiting to start treatment must have waited less than 26 weeks from referral to treatment**
- **100 per cent of patients not treated within 26 weeks must be treated in 36 weeks.**

The Welsh Government measures progress against these targets each month, and the figures used are **those for patients waiting to start treatment at the end of the month**. Separate figures for patients treated during each month are published,<sup>3</sup> but as these are not covered by the targets they have not been included in this release.

<sup>1</sup> The targets apply to the majority of referrals to NHS hospitals for treatment; however there are a number of exceptions. In addition, some conditions such as cancer have their own specific target, and are therefore not included in the general targets. Further information on referral to treatment targets is available at: Welsh Government, **Referral to Treatment Times – April 2012**, page 1, 14 June 2012 [accessed 18 June 2012]

<sup>2</sup> Welsh Government, **Referral to Treatment Times – May 2012**, 12 July 2012 [accessed 12 July 2012]

<sup>3</sup> Stats Wales [035295] – Referral To Treatment Times – Treated patients [accessed 12 July 2012]

## NHS Referral to Treatment Waiting Times in May 2012

Table 1 and figures 1 and 2 show performance against the 26 and 36 week referral to treatment waiting time targets for each LHB, and for the whole of Wales, using the latest figures from May 2012.<sup>4</sup> It can be seen from table 1 and figure 1 that:

- **In May 2012, neither the 26 nor 36 week targets were met on an All Wales basis.**
- **Betsi Cadwaladr and Powys LHBs** achieved the 26 week referral to treatment waiting time target in May 2012.
- **Powys LHB** met the 36 week target in May 2012. In a further 3 LHBs a very small number of patients had been waiting more than 36 weeks for treatment at the end of May 2012.
- **Cardiff and Vale University Health Board** was the worst performing LHB for both targets.

**Table 1: Performance against waiting time targets at end of May 2012 (a), (c)**

Local Health Board	Under 26 weeks		Under 36 weeks (b)		Total patients waiting for treatment
	Number of patients waiting	Percentage of all patients waiting	Number of patients waiting	Percentage of all patients waiting	
Abertawe Bro Morgannwg	69,507	94.3	73,427	99.6	73,699
Aneurin Bevan (d)	86,522	92.7	93,296	100.0	93,302
Betsi Cadwaladr (d)	70,983	95.2	74,569	100.0	74,586
Cardiff and Vale	65,713	90.5	71,027	97.8	72,612
Cwm Taf	30,707	93.4	32,477	98.8	32,862
Hywel Dda (d)	43,136	94.0	45,900	100.0	45,912
Powys	5,428	98.8	5,496	100.0	5,496
<b>Wales</b>	<b>371,996</b>	<b>93.4</b>	<b>396,192</b>	<b>99.4</b>	<b>398,469</b>

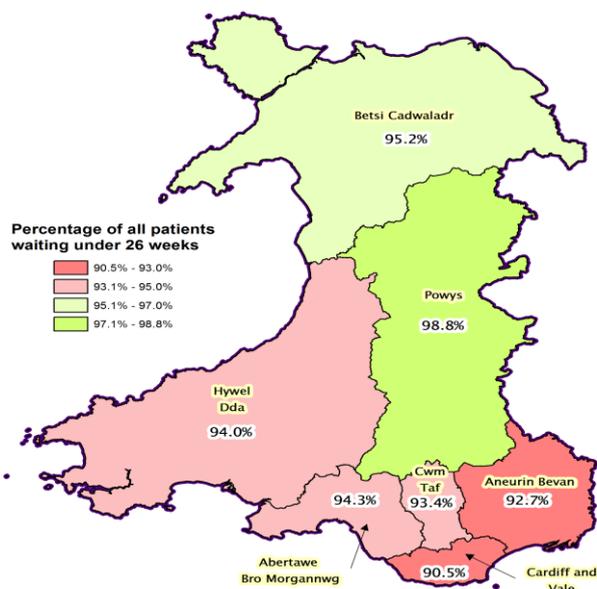

Source: Research Service calculations from Stats Wales [035296]

Notes:

- (a) This includes patients who are waiting for cardiac treatment. Cardiac RTT is defined differently from the rest of RTT; please refer to the **Welsh Government quality report** for further details.
- (b) The figures for patients waiting under 36 weeks for treatment include those waiting under 26 weeks and between 26 and 36 weeks for treatment.
- (c) Values in the purple shaded boxes met the referral to treatment waiting time targets in May 2012.
- (d) In Aneurin Bevan, Betsi Cadwaladr and Hywel Dda LHBs a small number of patients had been waiting to start treatment at the end of May 2012. The figures in table 1 are shown as 100.0 per cent due to rounding.

## Performance against RTT waiting time targets since May 2011

Table 2 and figure 3 focus on the performance against the referral to treatment waiting time targets, on an All Wales basis since May 2011.<sup>5</sup>

It can be seen from table 2 and figure 4 that:

- Neither target has been met in any month at an All Wales level between May 2011 and May 2012.

The percentage of patients waiting less than 26 and 36 weeks has decreased over the last two months. However, it is higher than for all months from May 2011 to February 2012.

Table 2: Performance against waiting time targets, on All Wales basis, May 2011 to May 2012 (a)

Date	Under 26 weeks		Under 36 weeks (b)		Total patients waiting for treatment
	Number of patients waiting	Percentage of all patients waiting	Number of patients waiting	Percentage of all patients waiting	
May 2011	350,344	92.4	372,548	98.2	379,292
June 2011	360,552	93.0	380,776	98.2	387,646
July 2011	365,413	93.2	385,202	98.2	392,271
August 2011	363,827	92.2	386,964	98.1	394,570
September 2011	359,166	91.5	385,033	98.1	392,467
October 2011	358,615	92.0	382,328	98.1	389,797
November 2011	356,019	92.0	379,348	98.0	386,977
December 2011	350,998	91.4	376,192	98.0	383,891
January 2012	346,716	92.3	369,176	98.3	375,719
February 2012	350,831	93.1	371,823	98.7	376,686
March 2012	366,989	94.0	388,614	99.6	390,228
April 2012	371,479	93.6	394,690	99.5	396,793
May 2012	371,996	93.4	396,192	99.4	398,469

Notes – See notes from Table 2.

## Trauma and orthopaedic specialty

While **waiting time targets are applied to performance across all specialties**, it is useful to see the contribution of individual specialties towards performance.

In a written statement in March 2011, the then Minister for Health and Social Services highlighted the difficulty in achieving waiting time targets due to pressures within orthopaedic services resulting from increased GP referrals.<sup>6</sup>

The Welsh Government allocated an additional £15 million in 2012-13 and £16 million in 2013-14 to increase capacity to deal with the increased demand for orthopaedic treatment.<sup>7</sup>

Table 3 shows the latest figures for the trauma and orthopaedic specialty, at the end of May 2012.<sup>8</sup>

**Table 3: Waiting times for trauma and orthopaedic specialty at end of May 2012, (a), (b)**

Local Health Board	Under 26 weeks		Under 36 weeks (a)		Total patients waiting for treatment
	Number of patients waiting	Percentage of patients waiting	Number of patients waiting	Percentage of all patients waiting	
Abertawe Bro Morgannwg	9,594	88.0	10,889	99.9	10,903
Aneurin Bevan	11,335	88.4	12,826	100.0	12,826
Betsi Cadwaladr	7,810	89.3	8,738	99.9	8,748
Cardiff and Vale	8,833	85.6	9,966	96.6	10,315
Cwm Taf	3,678	87.8	4,105	98.0	4,187
Hywel Dda	6,651	88.5	7,506	99.9	7,516
Powys	399	98.3	406	100.0	406
<b>Wales</b>	<b>48,300</b>	<b>88.0</b>	<b>54,436</b>	<b>99.2</b>	<b>54,901</b>

Source: Research Service calculations from Stats Wales [035296]

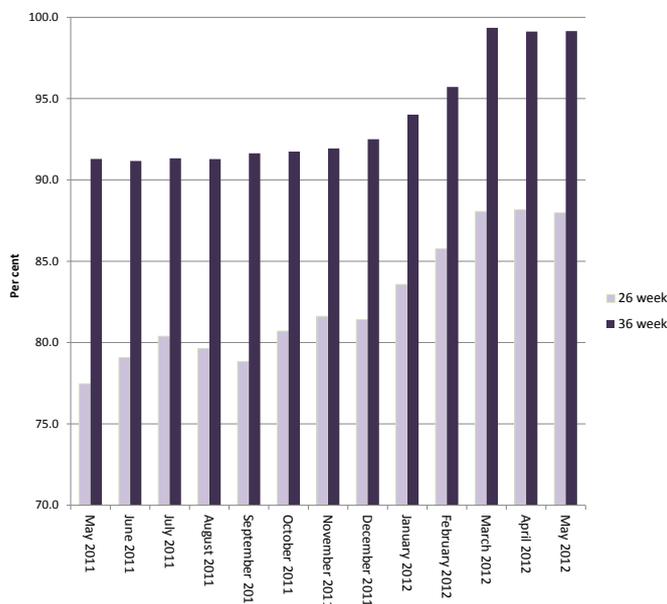

Notes:

- (a) The figures for patients waiting under 36 weeks for treatment include those waiting under 26 weeks and between 26 and 36 weeks for treatment.
- (b) Values in the purple shaded boxes indicate a level of performance in March 2012 equal to or above that needed to achieve the general waiting time targets.

- In **Powys Teaching Health Board** over 95 per cent of patients were waiting less than 26 weeks. In all other LHBs less than 90 per cent of patients had been waiting less than 26 weeks for treatment.
- In **Aneurin Bevan and Powys LHBs**, all patients had been waiting under 36 weeks for treatment. In a further three LHBs, 99.9 per cent of patients had been waiting under 36 weeks for treatment.
- The LHB with the lowest percentage of patients waiting under 26 and 36 weeks was **Cardiff and Vale University Health Board**.

Figure 4 compares the percentage of patients waiting less than 26 and 36 weeks for treatment in the trauma and orthopaedic specialty in the months from May 2011 to May 2012.<sup>9</sup>

**Figure 4: Percentage of patients waiting less than 26 and 36 weeks in the trauma and orthopaedic specialty, from May 2011 to May 2012**

Source: Research Service calculations from Stats Wales [016965] and [035296]

- For each month since May 2011, the percentage of patients waiting under 26 weeks has been **well below the level needed to achieve the waiting time target across all specialties**, although the figures for the past 3 months have been higher than for all previous months since May 2011.
- For each month since May 2011, the percentage of patients waiting under 36 weeks has also been **below the level needed to achieve the waiting time target across all specialties** although the figures for the past 3 months have been higher than for all previous months since May 2011.
