Leighton Andrews: The majority of funding for schools is distributed from the Welsh Government via the Revenue Support Grant (RSG) to local authorities based primarily on pupil numbers. There is no difference in this funding to local authorities based on language medium. Local authorities are then responsible for allocating funding to individual schools.

Based on information obtained from local authority Section 52 Outturn returns and the Post 16 Pupil Level Annual School Census (PLASC) returns, it is possible to identify school funding per pupil by sector and language medium. The data in the table below has been obtained from 2011-12 Section 52 Outturn returns and 2011 PLASC returns.

		£ per pupil
English medium	Primary	£3,610
Welsh medium	Primary	£3,718
English medium	Secondary	£4,402
Welsh medium	Secondary	£4,743

Gofyn i'r Gweinidog Iechyd a Gwasanaethau Cymdeithasol
To ask the Minister for Health and Social Services

Darren Millar (Gorllewin Clwyd): O'r cyfanswm o achosion o'r frech goch a gadarnhawyd yn yr ardal achosion bresennol yng Nghymru hyd yma, pa gyfran o'r achosion a oedd wedi'u brechu rhag yr afiechyd yn flaenorol (gan wahaniaethu rhwng y rhai a gafodd un dos o'r brechlyn MMR; y rhai a gafodd ddau ddos o'r brechlyn; a'r rhai a gafodd un brechlyn rhag y frech goch)? (WAQ64601)

Darren Millar (Clwyd West): Of the total number of confirmed measles cases in the current outbreak area in Wales to date, what proportion of cases had previously been vaccinated against the disease (distinguishing between those who received a single dose of the MMR vaccine; those who received two doses of the vaccine; and those who received a single measles vaccine)? (WAQ64601)

The Minister for Health and Social Services (Mark Drakeford): Data on confirmed measles cases and their immunisation history continues to be actively collected during the outbreak by Public Health Wales. The validity of the data will not be finally confirmed and published until after the outbreak is over, therefore the following statement is a preliminary and may be revised.

Current data as at 26 April shows very few confirmed cases have caught measles after having had the MMR vaccine. The vast majority of confirmed measles cases are individuals who have never been vaccinated with MMR. Less than 10 laboratory confirmed cases are reported to have previously received any MMR vaccination. This emerging data suggests that in the outbreak area one dose of MMR vaccine protects against measles in more than 95 out of every 100 vaccinated, and two doses protects in around 99 out of every 100 vaccinated.
