Dear Jason,

In response to your recent Written Question: What is this Government's position on nuclear power in Wales? (WQ 98842)

The Welsh Government recognises the significant contribution the nuclear sector has made to energy security and high-value employment in northwest Wales over the past sixty years.

We recognise the potential role of Small Modular Reactors at Gwyndod in supporting economic opportunities for Ynys Môn, north Wales and Wales as a whole, and have established a cross-government programme to coordinate a coherent national approach to this development. We also recognise the value of a clean energy mix and the economic opportunities that projects of this nature could bring.

Yours sincerely,

Adam Price AS/MS
Gweinidog Cabinet dros Fenter, Cysylltedd ac Ynni
Cabinet Minister for Enterprise, Connectivity and Energy
