

# NHS Referral to Treatment Waiting Times

August 2013

## Introduction

This briefing provides information on the performance of Local Health Boards (LHBs) against the Welsh Government targets for NHS treatment waiting times. Most NHS waiting times in Wales are measured against the time from referral to treatment (RTT), although there are a number of exceptions.<sup>1</sup> **The RTT is the period of time from referral, by a GP or other medical practitioner, to hospital for treatment.**<sup>2</sup>

The current Welsh Government targets for NHS RTT waiting times are to ensure that:

- **At least 95 per cent of patients waiting to start treatment must have waited less than 26 weeks from referral to treatment**
- **100 per cent of patients not treated within 26 weeks must be treated in 36 weeks.**

<sup>1</sup> The targets apply to the majority of referrals to NHS hospitals for treatment; however there are a number of exceptions. In addition, some conditions such as cancer have their own specific target, and are therefore not included in the general targets. Further information on referral to treatment targets is available at: Welsh Government, [Referral to Treatment Times – April 2012](#), page 4, 14 June 2012 [accessed 9 August 2013]

<sup>2</sup> Welsh Government, [Referral to Treatment Times, June 2013](#), 11 July 2013 [accessed 9 August 2013]

The Welsh Government measures progress against these targets each month, and the figures used **are those for patients waiting to start treatment at the end of the month**. Separate figures for patients treated during each month are published,<sup>3</sup> but as these are not covered by the targets they have not been included in this release. The LHB figures included in this release are for patients treated by each LHB rather than by LHB of residence, which are also published on Stats Wales.<sup>4</sup>

## NHS Referral to Treatment Waiting Times in June 2013

Table 1 and figures 1 and 2 show performance against the 26 and 36 week referral to treatment waiting time targets for each LHB, and for the whole of Wales, using the latest figures from June 2013.<sup>5</sup> It can be seen from table 1 and figure 1 that:

- **In June 2013, neither the 26 nor 36 week targets were met on an All Wales basis.**
- **Powys Teaching Health Board** achieved the 26 week and 36 week referral to treatment waiting time targets in June 2013.
- **Cardiff and Vale University Health Board** was the worst performing LHB for both targets.

Notes:

- (a) This includes patients who are waiting for cardiac treatment. Cardiac RTT is defined differently from the rest of RTT; please refer to the **NHS Wales Referral to Treatment Time quality report** for further details.
- (b) The figures for patients waiting under 36 weeks for treatment include those waiting under 26 weeks and between 26 and 36 weeks for treatment.
- (c) Values in the purple shaded boxes met the referral to treatment waiting time targets in June 2013.

## Performance against RTT waiting time targets since June 2012

Table 2 and figure 3 focus on the performance against the referral to treatment waiting time targets, on an All Wales basis since June 2012.<sup>6</sup>

It can be seen from table 2 and figure 3 that:

- **Neither target has been met in any month** at an All Wales level between June 2012 and June 2013.
- The percentage of patients waiting less than 26 weeks for treatment in June 2013 was 0.5 percentage points higher than in May 2013, but was the second lowest of any month over the past year.
- The percentage of patients waiting less than 36 weeks for treatment in June 2013 was 0.3 percentage points lower than in May 2013, and was the lowest of any month over the past year.
- The total number of patients waiting for treatment was the highest of any month over the past year.
- The total number of patients waiting over 36 weeks for treatment was the highest of any month over the past year.

Notes – See notes from Table 2.

## Trauma and orthopaedic speciality

While **waiting time targets are applied to performance across all specialties**, it is useful to see the contribution of individual specialties towards performance.

In a written statement in March 2011, the then Minister for Health and Social Services highlighted the difficulty in achieving waiting time targets due to pressures within orthopaedic services resulting from increased GP referrals.<sup>7</sup>

In 2011-12, the Welsh Government invested £21.5 million in orthopaedic services. In its Draft Budget 2013-14 it states that this investment enabled the number of patients waiting over 36 weeks for treatment in the trauma and orthopaedic speciality decreased from almost 6,000 in June 2011 to 356 in March 2012.<sup>8</sup> The Welsh Government allocated an additional £15 million in 2012-13 to deal with the increased demand for orthopaedic treatment.<sup>9</sup> It has also stated that £16.6 million will be allocated in recurrent annual funding from 2013-14 with the purpose of sustaining improvements in orthopaedic waiting times.<sup>10</sup>

Table 3 shows the latest figures for the trauma and orthopaedic speciality, at the end of June 2013.<sup>11</sup>

**Table 3: Waiting times for trauma and orthopaedic speciality at end of June 2013, (a), (b)**

Local Health Board	Under 26 weeks		Under 36 weeks (a)		Total patient waiting for treatment
	Number of patients waiting	Percentage of patients waiting	Number of patients waiting	Percentage of all patients waiting	
Abertawe Bro Morgannwg	8,605	84.8	9,845	97.0	10,14
Aneurin Bevan	10,621	85.8	12,063	97.5	12,37
Betsi Cadwaladr	8,086	84.1	9,305	96.8	9,61
Cardiff and Vale	7,745	88.6	8,554	97.9	8,73
Cwm Taf	3,239	75.2	3,910	90.8	4,30
Hywel Dda	7,371	81.9	8,549	95.0	8,99
Powys	533	96.7	551	100.0	55
<b>Wales</b>	<b>46,200</b>	<b>84.4</b>	<b>52,777</b>	<b>96.4</b>	<b>54,72</b>

Source: Research Service calculations from Stats Wales **Patients waiting to start treatment by latest month, local health board and weeks waiting**

Notes:

- (a) The figures for patients waiting under 36 weeks for treatment include those waiting under 26 weeks and between 26 and 36 weeks for treatment.
- (b) Values in the purple shaded boxes indicate a level of performance in May 2013 equal to or above that needed to achieve the general waiting time targets.

In June 2013, it can be seen that:

- **In Powys Teaching Health Board** over 95 per cent of patients were waiting less than 26 weeks. In all other LHBs, less than 89 per cent of patients had been waiting less than 26 weeks for treatment.
- **In Powys Teaching Health Board**, all patients have been waiting under 36 weeks for treatment.
- The LHB with the lowest percentage of patients waiting under both 26 weeks and 36 weeks was **Cwm Taf Health Board**.

Figure 4 compares the percentage of patients waiting less than 26 and 36 weeks for treatment in the trauma and orthopaedic specialty in the months from June 2012 to June 2013.<sup>12</sup>

**Figure 4: Percentage of patients waiting less than 26 and 36 weeks in the trauma and orthopaedic specialty, from June 2012 to June 2013**

Source: Research Service calculations from Stats Wales, [Patients waiting to start treatment by month and grouped weeks](#)

- For each month since June 2012, the percentage of patients waiting under 26 weeks has been **well below the level needed to achieve the waiting time target across all specialties**. The percentage of patients waiting less than 26 weeks in the trauma and orthopaedic specialty in June 2013 was 1.0 percentage point higher than May 2013, but was the second lowest of any month over the past year.
- For each month since June 2012, the percentage of patients waiting under 36 weeks has also been **below the level needed to achieve the waiting time target across all specialties**. The percentage of patients waiting less than 36 weeks in the trauma and orthopaedic specialty in June 2013 was the lowest of any point in the past year, and decreased by 0.4 percentage points compared to May 2013.
